Cancellation of Degree Programmes

At the Teaching Policy Review Committee in November 2014, it was pointed out to me that the following degree programmes have been running for small numbers of students (1-2 per year):

- Electronics and Electrical Engineering (Communications) (BEng/MEng Hons)
- Electronics with Bioelectronics (MEng Hons)
- Engineering for Sustainable Energy (BEng/MEng Hons)

The first two programmes are minor variants of our mainstream E&EE degree. The Sustainable energy programme is a minor variant of the E&M degree. There seems little point continuing these courses, as they are not attractive to UCAS applicants.

It was agreed at the Nov 2014 meeting to remove these degrees from the University prospectus in 2016. I propose to now cancel these degree programmes altogether and remove them from DRPS as well. I will ask PT’s to meet with 1\textsuperscript{st}/2\textsuperscript{nd} year students to see if they will switch back to the relevant mainstream degree.

I propose that the Bioelectronics MEng DPT be merged with the existing E&EE DPT to allow students to take those courses if they wish.
